

## A NEW CONCEPT : PLASTIC MEDICINE

**Dr. Sonal Jain**  
Noble Hospital &  
Maternity Home  
Dhar, Madhya Pradesh

In this beauty conscious era, can a homoeopath offer something to the world?? Of course, we can!! Homoeopathy is full of potential remedies to make the world full of beautiful people.

Dr. J.P. Gallavardin has done extensive work in this field and has found a new concept of plastic medicine. We all have heard about plastic surgery which gives shape to the nose, face, limbs etc....we have certain plastic medicines which can modify some parts of the body in regards to the formation, complexion etc. These are named plastic medicines by Dr. Gallavardin.

### MODE OF ACTION OF PLASTIC MEDICINE

If a drug is given which increases the nutrition of the tissue thereby bringing the repletion of the cells leading to the increased plumpness of that particular part, which causes the disappearance of folds and wrinkles leading to proper shaping of that particular part. Similarly diminishing the nutrition of a particular part will decrease the plumpness.

Thus you will find medicines having the capacity of increasing or diminishing a particular part there by giving a desirable shape to that particular part of the body.

**ADMINISTRATION:** for such purpose single dose of 200 potency is given of the selected medicine and allow it to work for 3,5, or 8 wks. Depending upon the

response of the patient to the selected medicine.

### REPETITION OF PLASTIC MEDICINE

When one wishes to increase the plumpness of a part give the remedy during the increasing moon that is to say 2nd, 3rd, and 4th day after new moon. When one wishes to diminish the plumpness of the part, give remedy during decreasing moon, that is 2nd, 3rd and 4th days after full moon.

The above lines explain the modification in the shape of a part of the body by increasing or decreasing the plumpness of that part. Similarly other modifications can be made by going through the repertory of plastic medicine by Dr. Gallavardin. Following are a few lines taken from the same.

### REPERTORY OF PLASTIC MEDICINE

1. Pelvis, hips, buttocks very fat to reduce Barayta carb, calc.carb, Antim
2. Buttocks very fat to reduce Nux vom.
3. Waist, body circumference large to reduce Sulphur, Nat mur.

15. Obesity of the belly--in men Calc.carb., Alumina, Staphy., Nux.vom.,
16. Obesity of Belly--in women Sepia, Calc.carb., Nat.mur.

*Dear Doctors*

Available in 30 ML, 100 ML, 450 ML BOTTLES

**Thank you**  
for your whole hearted acceptance of  
**Healwell**  
**Homoeopathic Dilutions**  
(With a difference)

**Assured & Consistent Quality  
for Best Therapeutic Results**

- Pharma Grade alcohol hence 100% purity
- State of the art technology to ensure uniformity of potency
- Reliable & genuine back potency to deliver consistency
- Specially designed dropper to avoid wastage

**SINTEX INTERNATIONAL LTD.**  
NR. SEVEN GARNALA, KALOL (N.G.) - 382 721  
Ph : 224301 TO 224305, 220031 TO 220035
